EDUCATION

University of California San Diego, La Jolla, California, CA

September 2025 — Present

B.S in Mathematics Computer Science, Minor in Data Science & Cognitive Science

GPA: 3.9/4.0

WORK EXPERIENCE

Sanford Burnham Prebys | *Data Analyst Intern*

January 2026 — Present

- Processed, cleaned, and visualized large-scale neuronal spike-train and connectivity datasets using Python, R, and MATLAB
- Automated and optimized data workflows by developing Python scripts and integrating new modules into existing analysis pipelines
- Applied statistical analysis and feature extraction to uncover patterns in neural activity and support data-driven insights
- Delivered structured outputs, documentation, and presentations communicating methods and findings to the research team

NCE | *Founder*

January 2026 — Present

- Built a no-code CSV EDA web app (Next.js + FastAPI): data cleaning, visualization, and significance testing with HCI-focused UX.
- Implemented workspace-isolated APIs and in-memory datasets per project and designed unique version control visualization.
- Shipped Meridian: LLM copilot (OpenAI + AI SDK) with tool calls into the backend; streaming, errors, per-stage chat persistence.

Meridian | *Developer Intern*

November 2025 — Present

- Utilized the Meridian developer package to build AI-assisted overview-detail interfaces tailored to dynamic data exploration.
 - Implemented customizable view specifications that allow users to rearrange and personalize interface layouts based on their information needs.
 - Developed interactive prototypes showcasing end-user-driven customization, improving usability for complex information workflows.
-

TECHNICAL PROJECTS

Fluorescent Signal Normalization Web App

February 2026

- Built a web application to streamline analysis of fluorescent signal data from Excel files
- Automated transformation of raw plate/well-based layouts into a consistent, analysis-ready format
- Implemented data normalization workflows to standardize signal comparisons
- Generated summary statistics and structured tables for direct import into GraphPad Prism

Ecommerce Dashboard

January 2026

- Developed a full-stack ecommerce dashboard with a Next.js (React) frontend and MongoDB backend, enabling Excel-style data manipulation on mobile and desktop.
- Integrated Google Authentication for secure login and session management, improving user access control and data security.
- Built scalable APIs and database schemas to handle product management, inventory tracking, and dynamic updates.

CrunchyRoll Award Data Analysis

September 2025

- Collected, cleaned, and wrangled multiple data frames to prepare for data analysis.
 - Analyzed relationship between different factors like total views, genre, pre adaptation manga sales.
 - Created a predictive model with data visualization to better showcase finding.
-

SKILLS

Languages: Python, Java, HTML, CSS, Javascript, R

Framework: React, Next.js, Tailwind

Developer Tools: Git, Github, VS Code, Jupyter Notebook, MATLAB

Libraries: Pandas, NumPy, Matplotlib, Seaborn
