EDUCATION

University of California San Diego

La Jolla, CA

B.S. in Mathematics-Computer Science, Minors in Data Science and Cognitive Science, GPA: 3.9

Expected June 2028

- **Relevant Coursework:** Advanced Data Structures (C++), Systems Programming (C, GDB), Numerical Linear Algebra

EXPERIENCE

AI Automation Software Engineer Intern

September 2026 – Present

Allied Legacy Partners

San Diego, CA

- Built **web dashboards and UI** that use **LLMs** to turn meeting transcripts into action items for the team
- Designed, developed, and deployed a **Python backend service** (Slack bot) that automates calendar, email, and file tasks
- Turned free-form user requests into **JSON** commands via **LLM APIs**, each routed to a Playwright automation
- Raised reliability by **validating every LLM-generated command** against a schema before it could touch live systems
- Migrated legacy data to **PostgreSQL (Supabase)**, redesigning schemas to speed up queries across **5+ systems**

Full Stack Software Engineer Intern (Part-time)

June 2025 – September 2026

UCSD Foundation Interface Lab

San Diego, CA

- Built the **AI chatbot system** for Meridian, the lab's **npm package** that adds AI analytics to any web app
- Engineered a **prompt-to-JSON-schema layer** so the AI renders the best-fit **front-end UI** per request
- Tested UI generation and data binding end to end in a **React, Next.js, and TypeScript** app before each release
- Worked with **product designers and engineers** in design meetings to turn user needs into shipped Meridian features

Python Software Developer Intern (Part-time)

January 2026 – May 2026

Sanford Burnham Prebys

San Diego, CA

- Built **Next.js web apps** that made data input and output intuitive for researchers, translating lab requirements into UI
- **Halved** data-prep time with a web tool converting raw lab output into ready-to-analyze GraphPad Prism datasets
- Cut neural-signal analysis time over **6×** (1 hour to under 10 minutes) with automated **Python pipelines** on **GBs** of data

Instructional Assistant, DSC 10 (Principles of Data Science)

Fall 2026 – Present

UC San Diego, Halıcıoğlu Data Science Institute

La Jolla, CA

- Help students **debug Python** one on one, grade assignments, and help lead discussion sections
- Lead a **study and social group** for DSC 10 students, reviewing course material and building community

TECHNICAL PROJECTS

No Code EDA | *Next.js, React, Python, FastAPI, Docker, OpenAPI*

- Built a **full-stack** AI analytics web app to explore datasets up to **25 GB** and create charts in plain English
- Designed **REST APIs** in FastAPI that let the React front end run data-analysis workflows on demand
- **Scaled to concurrent users** by containerizing each workspace with **Docker** in an isolated, reproducible environment

Ecommerce Dashboard | *Next.js, React, TypeScript, NextAuth, Firebase Firestore, Vercel*

- Shipped a **React/TypeScript** dashboard with **NextAuth** login, deployed on **Vercel**
- Synced per-user data across devices via **Firestore (NoSQL)**, using **debounced writes** to cut redundant saves

DeckScan & Wash Shuffle Research | *Next.js, Python, OpenCV, Computer Vision*

- **Tripled** data-collection efficiency with a **web app** that reads deck orderings from photos (with Prof. Peter Chi)
- Connected Next.js image capture to a Python **batch-inference** backend with CSV export across **600+ trials**

Signal Normalizer | *React, Node.js, Python, Pandas, OpenPyXL*

- **Halved** manual preprocessing time with a **full-stack** web app that automates fluorescence signal processing
- Built a **React** upload-and-review front end backed by a **Node.js** service that runs Python normalization jobs

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, C++, C, SQL, HTML/CSS

Front End: React, Next.js, Responsive UI, NextAuth, Vercel

Back End & Data: Node.js, FastAPI, REST APIs, PostgreSQL, Schema Design, Firebase Firestore (NoSQL)

Engineering Practice: Data Structures & Algorithms, Unit Testing, Code Reviews, Git, Docker, Linux, CI/CD

AI & Automation: LLM API Integration, AI Output Validation, n8n, Playwright
